We have a wide range of accessories to compliment Solar Covers:

DIY AquaSpoiler leading edge, which is totally encapsulated, easy to clean, robust and reusable on future solar covers.

Solarglide leading edge is a towing device which enables the cover to be pulled off the roller with ease. It can be supplied in kit form or factory fitted to the new cover.

Roller to cover attachment kit. This universal kit provides a simple method to enable it to be attached to any type of solar cover and roller.

Reinforced borders can be used all the way around or just at the towing end.

The new revolutionised SmartClic is simple to use and has the advantage of being able to be re-used.

Roller storage covers are available in a robust green reinforced PVC which is specifically designed for outdoor use.

## AQUAFLEX

The UK's leading Liner specialists

INTRODUCING THE

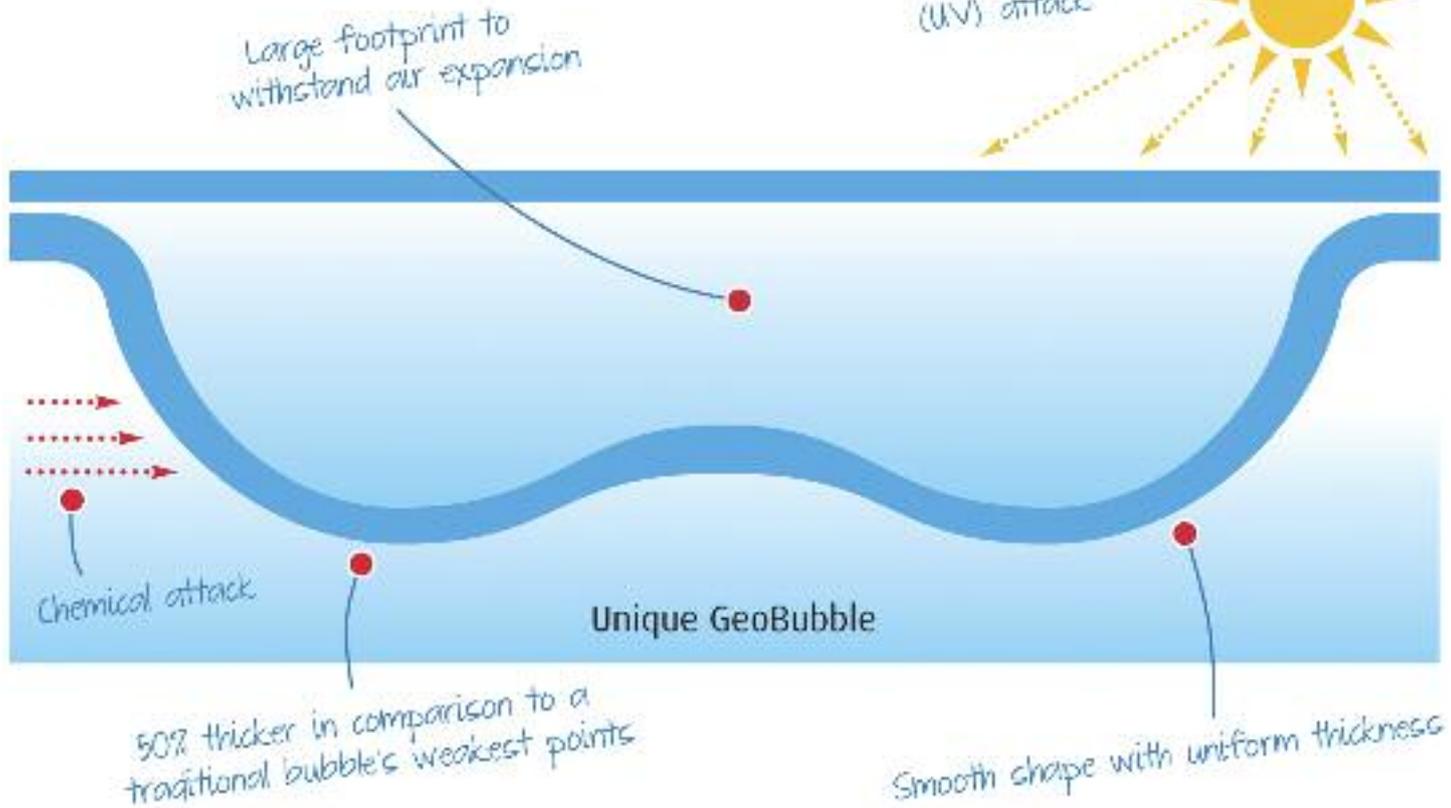

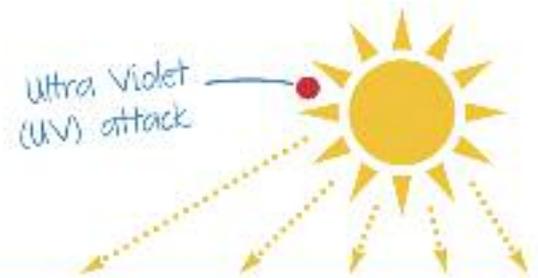

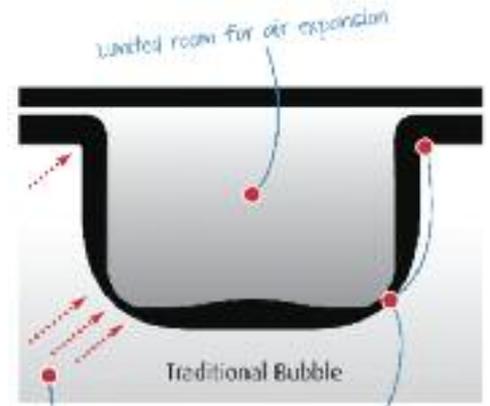

# NEW GEOBUBBLE

The GeoBubble technology and 'Guard' materials have been developed over the past 5 years.

Research has gone in to the use of the best additives, stabilisers, anti oxidant package and bubble design, with the aim to provide the best performing and longest lasting swimming pool bubble cover material available.

The new EnergyGuard and Sol+Guard materials with GeoBubble technology have a 6 year pro rata warranty.

## The new GeoBubble cover materials:

- Have a scientifically designed bubble shape that is stronger and will last longer against chemical and Ultra Violet (UV) attack.
- Will save you money, time and reduce the carbon footprint of your pool.
- Are available in a variety of standard colours and 'Guard' materials with their added benefits.

## Not all bubble swimming pool covers are the same

GeoBubble Technology...

...scientifically designed to be more resistant to chemical and UV attack for longer than a traditional shape bubble, and as a result its expected lifespan will increase by 25%+.\*

Eliminating weak and thin points gives you a stronger pool cover that can withstand chemical and Ultra Violet (UV) attack which leads to premature failure.
